

4800

The clear design language and consistent contours clearly reveal the family affiliation of the megaSun 4800 while showcasing unique details and innovations as well as, not least, an attractive design.

The equipment category is fitted as standard with evoSystem2, the innovative reflectors in the facial area for even better performance distribution and two p2-vitamin-D tubes. In conjunction with the latest technology, the pigment tubes achieve perfect skin-friendly tanning results and provide the body with enough essential vitamin D, while electronic ballasts reduce the energy consumptions of the tubes. Eco-friendly and cost effective!

Standard

4800 Super

Canopy with 22 x 100 W, (180 cm), 2 x p2 Vitamin D-tube
